

Get to Know the Five Senses

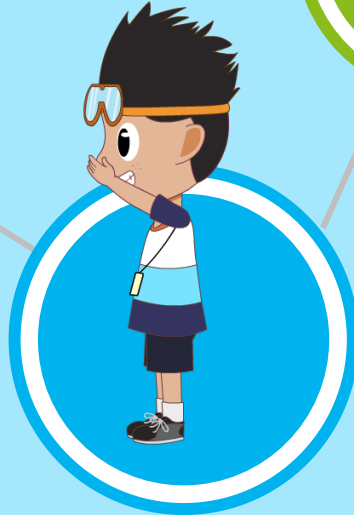

G3-U6-L1

Learn

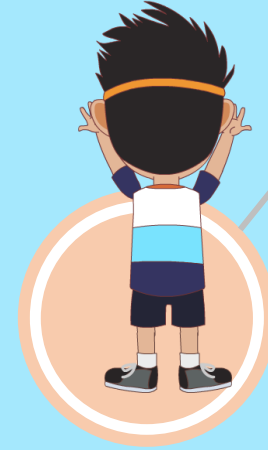

sight

smell

taste

touch

hearing

Sight, smell, taste,
hearing and touch—
our five senses teach
us about our world.

Our sense of sight is all dependent upon our eyes. A lens at the front of the eyeball helps to focus images onto the retina at the back of the eye.

Our nose is the organ that we use to smell. The sense of smell helps us to enjoy life and helps us learn about unsafe environments.

Our sense of taste comes from the taste buds on our tongue. The tongue is only able to taste four separate flavors: salty, sweet, sour, bitter and umami.

The sense of touch is spread through the whole body.

There are four kinds of touch sensations that can be identified: cold, heat, contact and pain.

Our ears, which help us hear, are made of two separate parts: the outer ear and the inner ear.

Practice

Fill in the blanks.

Our sense of _____
comes from the taste buds
on our tongue.

Our sense of _____ is all
dependent upon our eyes.

Practice

Fill in the blanks.

The sense of _____ is
spread through the whole
body.

Our nose is the organ that
we use to _____.

Complete the sentences according to the expression.

1. How does the music _____?

It _____.

Tips: 1. Have students complete the sentences;

2. Teacher can make more sentences to let students practice. For example, How does the flower ____? It _____. (2 min)

Complete the sentences according to the expression.

2. How does the pie _____?

It _____.

Tips: 1. Have students complete the sentences;

2. Teacher can make more sentences to let students practice. For example, How does the flower ____? It _____. (2 min)

Complete the sentences according to the expression.

3. How does the apple _____?

It _____.

Tips: 1. Have students complete the sentences;

2. Teacher can make more sentences to let students practice. For example, How does the flower ____? It _____. (2 min)

Conclusion

1. We have learned the key words:
sight, smell, taste, hearing, touch

Conclusion

2. We have learned the key sentences:

Sight, smell, taste, hearing and touch—our five senses teach us about our world.

Our sense of taste comes from the taste buds on our tongue.

Our sense of sight is all dependent upon our eyes.

The sense of touch is spread through the whole body.

Our nose is the organ that we use to smell.

Our ears help us hear.
