

# Animals and Sounds

**G3-U4-L7**

# Learn

mate

n. an animal's sexual partner

territory

n. an area of land, sea, or space, esp. when it belongs to or is connected with a particular country, person, or animal

predator

n. an animal that hunts, kills, and eats other animals

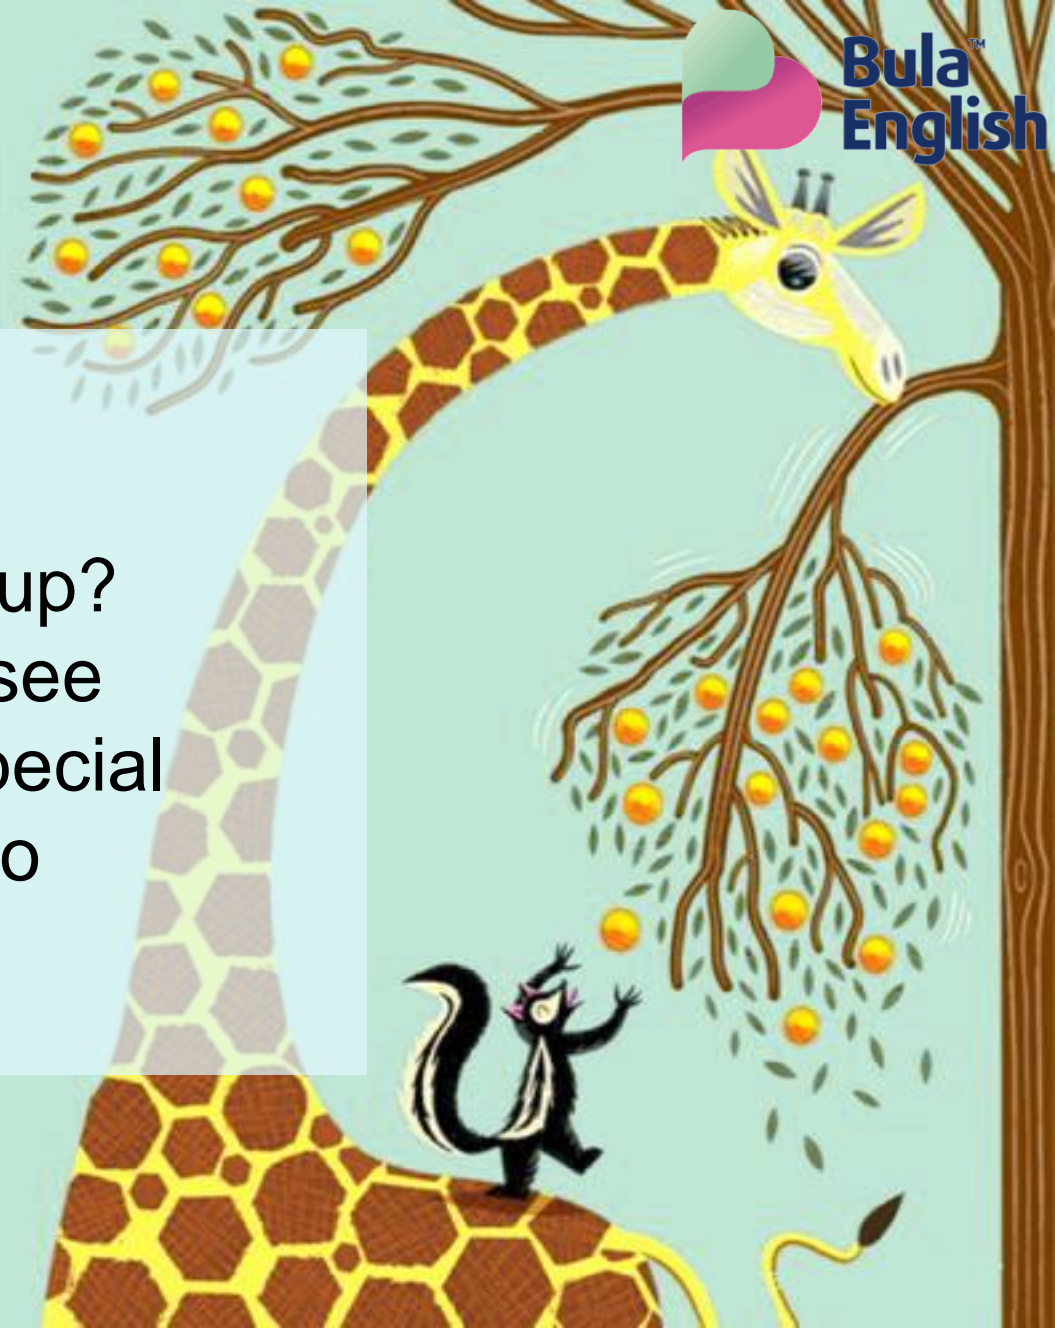

## Animals and Sounds

People use languages to communicate. Many animals don't use words to communicate. But they have many other ways to communicate.

## Animals and Sounds

Have you seen fish swimming in a group? Do they swim together because they can see each other? That's not true. They make special sounds, which can only be heard by fish, to keep swimming together.

## Animals and Sounds

Birds are also good at using sounds. There are two main reasons for birds to use sounds. The first one is that they use sounds when they look for mates. The other reason is that they make sounds to warn other birds that a predator is nearby. Birds are the best animals at communicating.

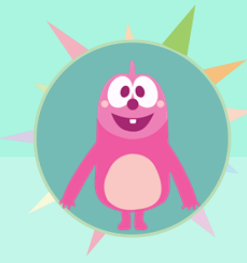

## Animals and Sounds

Frogs use songs to let other animals know about their territories. Other animals, such as whales, chimpanzees, and seals, all make sounds to communicate in their social groups.

Each animal makes its own sounds to express unique meanings.

# Practice

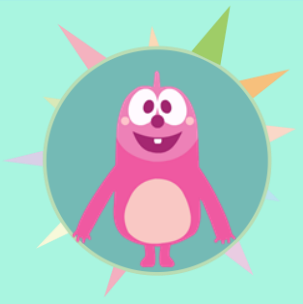

True or False.

1. Animals cannot communicate. **F**
2. Fish swim together because they can see each other. **F**
3. Birds are good at using sounds. **T**

# Practice

True or False.

4. Fish are the best animals at communicating. **F**

5. Frogs use songs to let other animals know about their territories. **T**

Tips: Have students complete these questions. Correct the wrong sentences.(1 min)
