

Prevent Germs from Spreading

G4-U4-L10

Learn

Germs can spread to your hands by sneezing, coughing, or rubbing your eyes, and then they could be transferred to other family members or friends.

Learn

Avoid close contact.

Avoid close contact with people who are sick. When you are sick, keep your distance from others to protect them from getting sick too.

Stay home when you are sick.

If possible, stay home from work, school, and errands when you are sick. This will help prevent spreading your illness to others.

Learn

Clean your hands.

Washing your hands often will protect you from germs.

Avoid touching your eyes,
nose or mouth.

Germs are often spread when a person touches a surface or object that is contaminated with germs and then touches his or her eyes, nose, or mouth.
